SUMMARY

AI Engineer with hands-on experience building GenAI, LLM, RAG, and machine learning systems. Skilled in Python, FastAPI, PyTorch, TensorFlow, and scalable AI application development from research to deployment.

TECHNICAL SKILLS

- **Languages:** Python(primary language), JavaScript, TypeScript, SQL, C++, Java
- **AI / Generative AI:** LLMs, RAG, LangChain, LangGraph, Knowledge Graphs, Prompt Engineering, Hugging Face, Transformers, Sentence Transformers, Embeddings, Vector Search, ONNX Runtime
- **Backend & APIs:** FastAPI, Django, Flask, REST APIs, Async Programming, Background Tasks, JWT Authentication
- **Databases & Storage:** PostgreSQL (Neon), MongoDB, MySQL, Redis, FAISS
- **Cloud & DevOps:** AWS (EC2, S3, IAM, Bedrock, SageMaker), Docker, Render, Vercel, Git, GitHub
- **Computer Vision:** OpenCV, Pillow (PIL), Grounding DINO, CLIP, OCR
- **Tools & Platforms:** Postman, Hugging Face Spaces, Groq API, Kaggle
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, System Design, Problem Solving

EXPERIENCE

Full Stack Web Development Intern — IPSOL Technologies

May 2026 – Jul 2026

Next.js, FastAPI, PostgreSQL, REST APIs

- Developed and maintained full-stack web applications using modern frontend and backend technologies.
- Built RESTful APIs, integrated databases, and implemented authentication and backend business logic.
- Collaborated with the development team to build scalable, production-ready features and improve application performance.

PROJECTS

FineWeb-1.5B: Foundation LLM from Scratch

Jun 2026 – Jul 2026

PyTorch, Amazon SageMaker, Distributed Training, Hugging Face

- Built and trained a decoder-only Large Language Model (LLM) from scratch using PyTorch on Amazon SageMaker.
- Developed an end-to-end pretraining pipeline with tokenizer integration, mixed-precision training, checkpointing, and evaluation.
- Published model checkpoints on Hugging Face for reproducibility and future fine-tuning.

Maestro AI: Agentic RAG

Apr 2026 – May 2026

FastAPI, LangGraph, PostgreSQL, Knowledge Graphs, Vector Search

- Built an enterprise-grade Agentic RAG system supporting PostgreSQL databases and Knowledge Graph retrieval.
- Designed intelligent document processing, semantic indexing, and multi-stage retrieval pipelines.
- Developed a modular architecture for scalable enterprise AI search over structured and unstructured data.

AI-Powered Smart Accident Management

Jan 2026 – Mar 2026

FastAPI, Flutter, Redis, Grounding DINO, Event-Driven Architecture

- Built an event-driven incident management platform using FastAPI with custom background-task orchestration.
- Integrated Grounding DINO vision API and Redis caching for real-time incident processing and notifications.
- Developed a Flutter application for AI-powered accident reporting with image upload and GPS support.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Sep 2024 - June 2028

KIET Deemed to be University, Ghaziabad, India

Current SGPA: 8.0

(Till 4th Semester)

CERTIFICATIONS & PARTICIPATION

- **AWS Certified Data Engineer – Associate**
Validated knowledge of data pipelines, data processing, and scalable data systems on AWS.
- **AWS Certified Cloud Practitioner**
Demonstrated understanding of AWS cloud concepts, services, security, and deployment models.
- **AWS Certified Machine Learning Engineer - Associate**
Demonstrated understanding of AWS cloud concepts, services, security, and deployment models.
- **Geek Room Certificate**
Recognized for active participation in technical community initiatives and development activities.
